

T&T LAB-8

BISWARUP MUKHERJEE

ROLL - 1806468

1. WAP in python which consists simple multiple choice question based on general knowledge, technical, animals, places, plants, everything so that the user has to select the correct answer each time to get some points and move to the next question. The user will get 50 bonus points if he/she gets 5 consecutive questions correct. If the user gives 3 wrong answers then the game will stop there. (in each category 10 questions, 1 or 2 points for 1 right question).

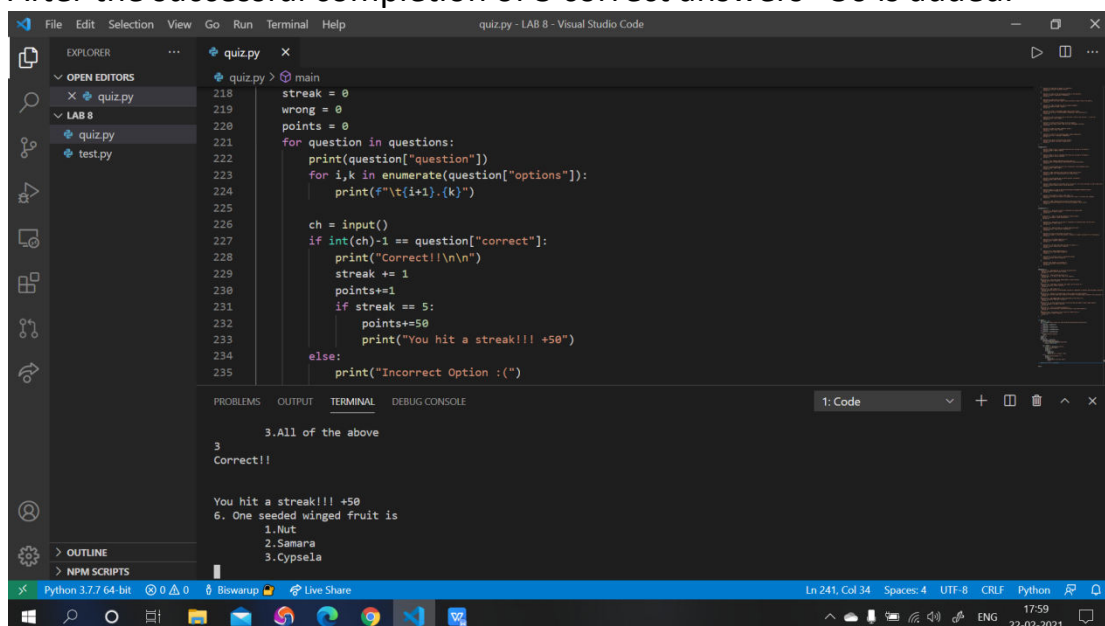

```
218 streak = 0
219 wrong = 0
220 points = 0
221 for question in questions:
222     print(question["question"])
223     for i,k in enumerate(question["options"]):
224         print(f"\t{i+1}. {k}")
225
226     ch = input()
227     if int(ch)-1 == question["correct"]:
228         print("Correct!!\n\n")
229         streak += 1
230         points+=1
231         if streak == 5:
232             points+=50
233             print("You hit a streak!!! +50")
234     else:
235         print("Incorrect Option :(")
```

Please select your topic
1-GK
2-Tech
3-Animals
4-Plants
4

1. Which part of plant is responsible for making food?
1.Leaf
2.Root
3.Trunk

After the successful completion of 5 correct answers +50 is added.

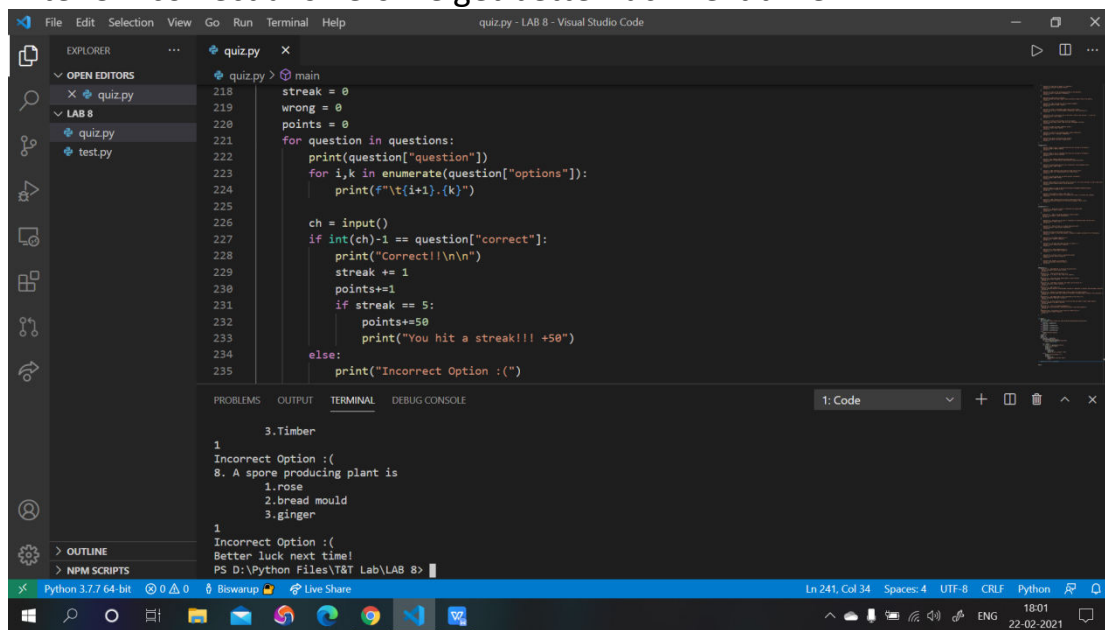

```
218 streak = 0
219 wrong = 0
220 points = 0
221 for question in questions:
222     print(question["question"])
223     for i,k in enumerate(question["options"]):
224         print(f"\t{i+1}. {k}")
225
226     ch = input()
227     if int(ch)-1 == question["correct"]:
228         print("Correct!!\n\n")
229         streak += 1
230         points+=1
231         if streak == 5:
232             points+=50
233             print("You hit a streak!!! +50")
234     else:
235         print("Incorrect Option :(")
```

3.All of the above
3
Correct!!

You hit a streak!!! +50

6. One seeded winged fruit is
1.Nut
2.Samara
3.Cypselia

After 3 incorrect answers we get better luck next time.
